

San José, May 27, 2019
MICITT-DM-OF-353-2019

Mr
Carlos Ríos
Gerente General
National Instruments

Dear Mr:

This letter is to invite you to participate in our new project, Testbed. The goal of Testbed in Costa Rica, a project led by this Ministry in coordination with the Inter-American Development Bank (IDB), is to support the development and testing of commercial 5G services aimed primarily at export and corporate customers and based mainly on software development.

It should be noted that Testbed will be a meeting place for building cooperation among Costa Rican companies, their international customers and public administrations.

Attached is a presentation prepared by the IDB for clarifying the concepts and giving a broader panorama of this project, which we are convinced will be of great interest for the country's technological development.

We are in the process of identifying companies with an interest in participating in the creation of this project; with the results of this study, we will be able to estimate the demand for Testbed 5G services. To this end, please inform us if you are interested in participating.

If possible, please send us your information no later than may 31, 2019, since it must be remitted to the IDB consultant for the aforementioned study before we can develop the 5G technology through the Testbed project.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Edwin Estrada Hernández
MINISTER a.i.

MCN

Cc: Sr. Luis Adrián Salazar Solís, Ministro. MIICTT.
